

SUMMARY

A detail-oriented and creative frontend developer with expertise in building visually appealing, user-friendly, and responsive web applications. Proficient in modern frontend technologies like HTML5, CSS3, JavaScript (and frameworks like React). Skilled in optimizing performance, implementing accessible designs, and collaborating with cross-functional teams to deliver seamless user experiences. Continuously learning and adapting to new trends and technologies to craft high-quality web solutions

EDUCATION

Ramniranjan Jhunjhunwala College

Master's of Science in Computer Science
2024 - 2026

S.K. Somaiya College

Bachelor's of Science in Computer Science
2019 - 2022

Ramniranjan Jhunjhunwala College

HSC - 61.54%
2017 - 2019

Eden High School & Jr. College

SSC - 84.40%
2017

SKILLS

- React
- UI/UX
- MongoDB
- MySQL
- Next.js
- Figma
- Bootstrap
- JavaScript
- HTML
- CSS

CERTIFICATIONS

- UI/UX Course - Udemy
- MERN Stack - Udemy

PROJECTS

AI CAREER COACH

The AI Career Coach Application is built using modern web technologies and integrates AI-powered tools along with a Retell AI Voice Agent to provide personalized career guidance and job preparation support. The platform assists users in building essential career assets and improving their employability through intelligent automation and real-time interaction.

- Developed an AI Career Coach Application to assist users with career preparation using AI-driven tools
- Built features like Resume Builder and Cover Letter Generator for automated, professional document creation
- Implemented voice-based mock interviews using Retell AI Voice Agent for real-time interview simulation
- Designed an Aptitude Test module with instant evaluation and performance feedback
- Integrated industry insights module to provide trending skills and job role recommendations.
- Created a responsive and user-friendly UI for seamless user experience
- Utilized API integration for dynamic and real-time content delivery.

Tech Stack: React, Next.js, Express, Node.js, ShadCN, Clerk, Retell AI, Gemini API, Neon DB.

AI Medical Doctor Voice Agent

The AI Medical Doctor Application is developed using modern web technologies and integrates a VAPI Voice Agent to provide users with preliminary health guidance through real-time voice interaction. The system analyzes user-entered symptoms and suggests appropriate doctors, enabling users to consult an AI-powered virtual doctor for basic medical advice.

- Developed an AI Medical Doctor Voice Agent for symptom analysis and doctor recommendation
- Implemented real-time voice consultation using VAPI for interactive AI-based diagnosis support
- Built features for medicine suggestions, precautions, and automated report generation
- Designed a responsive UI with secure authentication and scalable database integration.

Tech Stack: Next.js, TypeScript, Tailwind CSS, ShadCN UI, Clerk, Neon DB, VAPI Voice Agent
